

EMBERGUARD

WILDLAND FIRE SUIT

- Agile. Visible. Ready for the Wild.
- Ultra-Light, High-Performance Fabric: Engineered for long shifts in rugged wildland environments without adding weight or bulk.
- Exceptional Breathability: Allows continuous airflow, helping regulate body temperature in high-heat, low-humidity field conditions.
- C-O Water Repellent Finish: Advanced chemical-free finish repels water while preserving breathability—staying lighter and drier in changing weather.
- YSY Segmented Tape: Lightweight, flexible heat-applied tape moves with the garment—no stiffness, no compromise on comfort.
- Ergonomic Fit: Articulated knees, elbows, and gusseted underarm construction for unrestricted movement during climbing, crawling, or rapid direction changes.

TUNIC

- Highly breathable fabric for heat and moisture management
