ULTIMATE GLOW+ PBI FIREFIGHTING GLOVES

NFPA3200
style shown

FEATURES

- Revolutionary Photoluminescent Technology:** These gloves absorb UV light during the day and emit a powerful 555-nanometer afterglow in low-light conditions. Featuring glow zones on the fingertips and the back of the hand, they enhance firefighter visibility, improve situational awareness, and support safer navigation in high-risk, smoke-filled environments—where traditional flashlights often fall short.
- Open Gauntlet:** Designed for enhanced fit, this option ensures a secure yet comfortable fit around your wrist, allowing for unrestricted movement and flexibility.
- Long Gauntlet (Texas Style):** Constructed from Nomex® fabric, this option is perfect for wearers requiring gloves over sleeves, providing an additional layer of thermal protection and peace of mind.
- Advanced Grip and Abrasion Performance:** PBI® Flex 7™ is engineered to elevate your performance with increased grip and abrasion resistance, providing you with the confidence to tackle any task with precision and control.
